The authors unanimously wish to retract this paper because of several incorrect statements and erroneous presentation of primary data, results and conclusions.

In the “Peptides and viruses” section of the Methods (p. 361), the sequence should have read, “...HIV Tat (amino acids 48–60, GRKKRRQPPQ) peptides...”

We regret the error.

In the version of this article initially published online, the last sentence of the ‘Isolation of *Plag4a*^{-/-} and wild-type glomerular mesangial cells’ section of the Methods contained an error. Both instances of ‘μm’ should read ‘μM’.

We regret the error.
